

LAVINIA BOHO

COLLECTION GEO | 2016

GEO

For those who appreciate usefulness and still do not reject aesthetics

Modern interpretation of classic style

All combined elements blend seamlessly into the actual image of a room. Many of the models serve as a flair and render a special touch to the interior.

The stainless steel basket adds functionality to the working area and harmonizes with a capacious

kitchen sink. A distinctive cutting board provides supreme operational comfort.

The quartz kitchen sink is distinguished by superior operational and aesthetic characteristics. It creates elegant finished appearance of your interior in various style trends. The model is designed in 12 color options and serves as a perfect complement to a tabletop of different colors and texture. The product strength and long service life over the next several decades are achieved through the use of precast stone during the sink production.

The kitchen sink faucet has a retractable spout which facilitates the filling process of big pots and tall wine glasses. The product is made from stainless steel and has a wear-resistant coating intended for extensive and long-term use. You will be captivated by intriguing design of the faucet. Easy movement of the spout is ensured by reliable stainless steel spring. The possibility of water return is excluded by back-pressure valves.

You may quickly drain dishes in the basket mounted into the sink bowl. Moreover, it is an additional saving of working space and time.

QUARTZ KITCHEN SINK

Distinguished by increased depth and functional design

You will find a real pleasure in using high-quality and functional Geo quartz kitchen sink. Elegant capacious bowl with minimalistic features makes the working process in the kitchen more comfortable and rational.
