Use and care
of ceramic products

laviniaboho.com

Dear Customers!

Thank you for having chosen Lavinia Boho ceramic products. During production we apply state-of-the-art technologies: die casting, robotic glazing on automated lines, roasting in advanced automated furnaces.

Product designation

Ceramic products are to be installed in sanitary facilities of multifunctional buildings and intended for sanitary and hygienic application.

Before installation

Installation and operation manual for the specific ceramic product is attached to the purchased product and packaged in a container. Read and follow this instruction manual in order to avoid injuries and property damage.

Ceramic products shall be installed by qualified sanitary technicians.

Instructions for use and care of ceramic products

Use the product for intended purpose only.

It is strictly prohibited:

- throw rubbish or domestic waste in the manufactured product;
- pour cement and adhesive mixtures into the manufactured product;
- put or drop heavy things on the manufactured product;
- stand on the manufactured product;

In order to prevent rusty points, it is recommended to wipe ceramic products with a soft cloth after each use.

Do not use bad water (hard water, water with mechanical impurities, etc.) for the product. Do not connect to water supply system having parameters inconsistent with installation instructions. Glazed surface of the product is easy-to-clean. Use warm soapy water to clean ceramic surface; do not use abrasive, acid, alkaline or other aggressive cleaning agents, different solvents, including organic solvents, as they may damage glazed surface of the product. Do not use hard and wire brushes for cleaning ceramic products (and other cleaning means that may damage the product surface).

Annually check installation position and reliability of ceramic products.

Store out of direct sunlight.

Check holding strength after installation.

Do not use damaged ceramic products, defective drain valves, faulty water supply system or sewerage system. In the event of failure of water supply system, turn off the water supply to the point of entry into the collection bowl.

Terms of warranty

Complete list of warranty terms can be found in attached documents: warranty card and installation and operation manual for ceramic products.

Manufacturer and Seller warrant operational suitability of ceramic products and their usability for the purpose intended within the warranty period.

Extra information

There are no toxic pollutant emissions from ceramic products during their installation and use.

Our products have no harmful effect on human organism.

Our ceramic products are not subject to obligatory certification.
