**Use and care  
of faucets and shower products**

[laviniaboho.com](http://laviniaboho.com)

Dear Customers!

Thank you for having chosen Lavinia Boho products. During production of our faucets, thermostats, shower products and related components, we apply state-of-the-art technologies, carry out detailed and mandatory premarket testing of each production unit.

### **Product designation**

Faucets and shower products are to be installed in sanitary facilities of multifunctional buildings and intended for sanitary and hygienic application.

### **Before installation**

Installation and operation manual for the specific product is attached to the purchased product and packaged in a container. Read and follow this instruction manual in order to avoid injuries and property damage.

The products shall be installed by qualified sanitary technicians.

Before installation the product shall be stored in an undamaged original package. In case of prior unpacking, all product items shall be reliably packaged again in such a way as to avoid their contamination and damage.

The products shall be connected through filters what eliminates ingress of any mechanical impurities with water inside the faucet.

We recommend you to install pressure reducing valve to guarantee pressure relief in water supply system (in order to avoid any product damage caused by pressure drop).

### **Instructions for use and care of the products**

Check holding strength after installation.

Use the faucet and shower products for intended purpose only.

It is recommended to wipe the chrome-surfaced faucet and related components with a dry or wet cloth (depending on type of contamination).

Do not use bad water (hard water, water with mechanical impurities, etc.) for the product. Do not connect the faucet or shower unit to water supply system having parameters inconsistent with installation instructions.

Chrome-surfaced products are easy-to-clean. Use warm soapy water to clean the surface; do not use abrasive, acid, alkaline or other aggressive cleaning agents, different solvents, including organic solvents, as they may damage chrome surface of the faucet and related components. Do not use hard and wire brushes for cleaning chrome surfaces (and other cleaning means that may damage the product surface).

### **Terms of warranty**

Complete list of warranty terms can be found in attached documents: warranty card and installation and operation manual for faucets and shower products.

Manufacturer and Seller warrant operational suitability of faucets and shower products and their usability for the purpose intended within the warranty period.
