**Use and care
of shower screens and cabins**

laviniaboho.com

Dear Customers!
Thank you for having chosen Lavinia Boho products.

Product designation

Shower units are to be installed in sanitary facilities of multifunctional buildings and intended for sanitary and hygienic application.

Before installation

Installation and operation manual for the specific product is attached to the purchased product and packaged in a container. Read and follow this instruction manual in order to avoid injuries and property damage.

Shower screens and cabins shall be installed by qualified sanitary technicians.

Before installation the shower unit shall be stored in an undamaged original package. In case of prior unpacking, all product items shall be reliably packaged again in such a way as to avoid their contamination and damage.

Do not put any things on the shower unit (also when packaged). The product is subject to mechanical damages.

Before commencing installation of the shower unit or cabin, all construction works in sanitary facilities shall be completed. Check the quality of all preparatory (pre-installation) works performed (leveling of a surface, water supply, sewerage system, etc.).

The shower cabin shall be connected through filters what eliminates ingress of any mechanical impurities with water inside the product. We recommend you to install pressure reducing valve to guarantee pressure relief in water supply system (in order to avoid any product damage caused by pressure drop).

Instructions for use and care of the products

Check holding strength after installation.

Use the product for intended purpose only.

It is recommended to wipe the product with a dry or wet cloth (depending on type of contamination) after taking a shower.

Do not use bad water (hard water, water with mechanical impurities, etc.) for the product.

Shower screen and cabin are easy-to-clean. Use warm soapy water to clean the shower unit; do not use abrasive, acid, alkaline or other aggressive cleaning agents, different solvents, including organic solvents, as they may damage the product. Do not use hard and wire brushes for cleaning shower units (and other cleaning means that may damage the product surface).

Annually check installation position and reliability of the shower unit.

Terms of warranty

Manufacturer and Seller warrant operational suitability of the shower unit and its usability for the purpose intended within the warranty period.

Warranty period for shower screens and cabins is to be specified by Seller in warranty card.
